### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments, see Remarks, filed April 25, 2005, with respect to the rejection(s) of claim(s) 1-6 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art reference.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-6** are rejected under 35 U.S.C. 102(e) as being anticipated by Tomat et al. (US 6,784,925.)

Regarding claim 1, Tomat discloses a method comprising the steps (a) of storing at least one image file (col. 7 lines 16-22) in a memory in the digital camera (col. 14 lines 54-56), (b) coupling the memory to the host computer (fig. 1) so that the host computer identifies the at least one image file, recognizing the presence of the digital image and the at least one audio data segment in the memory (fig. 24, col. 15 lines 54-61), (c) producing at least two icons which are provided on a display associated with the

host computer and which respectively represent the digital image and the at least one audio data segment (fig. 24 indicators 211 and 222, respectively), and (d) selectively accessing the digital image icon or the at least one audio data segment icon to cause the transfer of the digital image or the at least one audio data segment from the memory to the host computer for access by a user (col. 16 lines 11-31.)

Regarding claim 2, Tomat discloses all of the limitations of claim 2 (see the 102(e) rejection to claim 1 supra) including disclosing a method wherein the memory is a removable memory card (col. 8 lines 55-64.)

Regarding claim 3, Tomat discloses all of the limitations of claim 3 (see the 102(e) rejection to claim 1 supra) including disclosing a method wherein the memory is a PCMCIA card (col. 8 lines 55-64.)

Regarding claim 4, Tomat discloses all of the limitations of claim 4 (see the 102(e) rejection to claim 1 supra) including disclosing a method wherein step (c) includes using software in the host computer to identify predetermined icons which are displayed in association with the digital image and the at least one audio data segment (fig. 24, col. 2 lines 7-22, col. 5 lines 49-53.)

Regarding claim 5, Tomat discloses all of the limitations of claim 5 (see the 102(e) rejection to claim 1 supra) including disclosing a method wherein step (d) includes accessing the selected icons to provide a video image of the digital image or the audio sound of the audio data segment, individually or in combination (fig. 24; col. 16 lines 62 – col. 17 line 1; col. 15 lines 54-61; col. 21 lines 61-64.)

Regarding claim 6, Tomat discloses all of the limitations of claim 6 (see the 102(e) rejection to claim 1 supra) including disclosing a method wherein the host computer includes a hard drive memory for storing the transferred digital image or the at least one transferred audio data segment (col. 6 lines 51-57), and wherein the host computer identifies the digital camera memory as though it were a file system of an additional hard drive memory for accessing the image files (col. 14 lines 54-62.)
